2023
- Agile Certified Practitioner (PMI-ACP)
- Data Analysis
- Professional Scrum Master I

2019
- Transformational Leadership

2018
- Advanced Business Analysis (ABA)
- Fundamental Business Analysis (FBA)

Thien Huynh

Project Manager / Scrum Master

- Senior Project Manager with 8 years leading multi team initiatives in diverse domains from discovery to go-live. I turn strategy into a funded plan, keep sponsor aligned and close delivery with a clear outcome for the customer.
- I work in both Agile & plan-driven settings, discuss porfolio trade-offs with senior leaders, put risks on the table early with workable options and use delivery metrics to support decision rather than to decorate a status report.
- I also coach project managers and tighten PMO rhythm: planning standards, raid logs and the way that updates can reach executives.

Core strengths:

- End-to-end delivery from requirements analysis through release planning in regulated env.
- Prioritization with product owners and delivery leads, using team capacity & velocity to set a realistic timeline.
- Stakeholders management through clear goals, regular syncs and early escalation.
- Concise updates for Heads of departments to see a big-overview pictures and their roles.
- Hybrid delivery: whether it should be Scrum or Waterfall or to apply both.
- AI leverage to remove routine work and speed up preparation with ownership staying within the teams.

Experience

Feb 2025 - Present

NAB Vietnam (National Australia Bank)

Scrum Master

- Facilitate all Scrum ceremonies (Sprint Planning, Daily Stand-up, Sprint Review, Retrospective) for a cross-functional team of 10–12 members from Backend & Frontend, ensuring alignment with Agile principles.
- Deliver Java microservices for secure Authentication & Authorization solutions, ensuring alignment with enterprise security standards.
- Analyze and interpret API Interface Specifications to define logic flows, identify dependencies, and support the team in translating requirements into technical tasks.
- Lead release planning and forecasting activities, working with Product Owners to prioritize backlog items and establish realistic delivery timelines based on team velocity and capacity.
- Set sprint goals, coach members with the correct process and how to achieve the target with regular project cadence to keep stakeholders highly aware of the status and effective collaboration
- Ensuring transparency among team internally & external stakeholders so that trust are built and project delivers its true value
- Escalation effectively and demonstrating ownership by driving all decision-making of stakeholders towards resolution

Achievements

- Successfully completed the transition program of 'One Team Location' where AU / India & Vietnam are separated in function & operation.
- Delivered the project of 'Banker & Customer Context' where we fixed the problem of Bankers interact with Customers to serve them on behalf of their identities.
- Take over a legacy system of Authority Digital Access Management (ADAM) from a monolith and break it into Micro-services and BFF, UI integration.
- Successfully patch a security breach that could potentially caused major incident by reaching out in time for Pen Testing team for security scan.

Education

2017
Bachelor of Finance & Banking
University of Economics Ho Chi Minh City

Oct 2023 - Jan 2025

ST Engineering

Scrum Master

Achievements

- During my team at ST Engineering, the company is a big technology enterprise in Singapore and have just come to Vietnam to establish its Offshore Delivery Center (ODC).
- Working as a Scrum Master here is not just purely a Scrum Master, but more like an overall-role where things in-need and you have to take over it.
- We've received an HOCS (Health Operation Control System) project which is a legacy platform of a hospital and need to apply Svelte(Kit), Hasura, GraphQL to upgrade entirely the Frontend & Backend of it.
- Also, Vietnam was bidding for a GovTech project from Singapore and I participated in the audit trail to help provide all the artifacts and compliances to entitle that Vietnam is 100% capable of handling these types of project from Government.
- I have been running the project as well as building up the process play-book and setting up ground-rule to onboard, training, guiding and adopting the framework of software development and IT collaboration.

Oct 2021 - Sept 2023

FPT Software

Project Manager

- Initiate project from beginning and follow FPT PMO standard in opening & closing out projects. Got allocated in some projects at different phases and had to standardize its process.
- Leading a team with scale of 10-12 members.
- Perform activities for grooming and maintaining the product backlog. Contribute to backlog management, prioritization.
- Prepare user stories to agree with team and Product Owner.
- Facilitating discussion, decision making, and conflict resolution when discussing issues across cross-functional squads.
- Coaching regarding Agile methodology and Scrum framework. Ensuring effectiveness when applying every piece of Scrum so that team can benefit the most from its practices.
- Remove impediments and roadblocks which slow the team down on delivering sprint goals and ensuring values are delivered sprint-by-sprint
- Report back to PMO on a weekly basis where multiple PMs are located in one room and cross out dependencies (if any)
- Highlight challenges with proposed viable solution and help team to adapt to changes effectively and seamlessly

Achievements

- Take over a scrum team and continue the maintenance of a legacy system called HQ2 (Head-Quarter 2) from an Automotive Enterprise in the US that already lasted for over 20 years.
- Afterward, successfully sunset HQ2 and migrated all the needed data and features to a new platform called 1Dispatch using React and .NET
- Receive knowledge transfer for a transition from a US team to start the upgrade for a legacy website using PHP previously to a newer version and better looking.

July 2019 - Sept 2021

EQONEX | Vietnam *(Closed)*

Project Manager

- Providing end-to-end project management.
- Determine and define project scope and objectives
- Developing a project plan, monitoring progress, and tracking the traffic and workload of team members
- Managing stakeholders' expectations, as well as prioritizing and negotiating timelines and deliverables to meet key business objectives.
- Managing contracts with vendors and suppliers, risks, and external dependencies.
- Taking Scrum Master role for multiple teams in parallel and accountable for the quality of Scrum events.
- Using JIRA, Confluence, and available tools to monitor work stream and key metrics
- Generating project reports for executive management.
- Measure project performance to identify areas for improvement

Achievements

- Successfully launching the 'EQONEX Crypto Exchange' application on both Web and Mobile during the COVID-19 pandemic, upfront the highest needs for online transaction due to lockdown.
- Release critical features: Deposit & Withdrawal, eKYC.
- Play an Admin role for JIRA/Confluence to set up automation, workflow, customization and streamline all teams across the organization. Guideline groups on how to use the designed patterns effectively.
- Facilitate daily and scrum ceremonies for multiple teams in Hongkong, Australia, Moldova,...
- Sadly, the company was Closed due to the downfall of the entire crypto market.

June 2017 - June 2019

Swiss Post Solutions Vietnam

IT Business Analyst

- Collect and Understand customer business process, needs and requirements.
- Analyze requirements from customers in business, technical and end-user perspective.
- Engage stakeholders to determine and advice the best solution for the project.
- Ensure business requirements are at its most-fully understood by Development and provide input to design and product specifications.
- Create documentation for implementation team and end-user.
- Documentation, keep track and manage requirements, specifications and change requests of projects.
- Transfer requests for dev & test team to go over the specification, Q&A, consult the solutions or handle problems.
- Acting as a bridge to minimize the gap between the requirement/ implementation and realistic of the project
- Consult ideas, improvement based on customers' requirement to optimize the the product.
- Perform pre-sales activities (effort estimation, software demo, RFP response, sales collateral)

Achievements

- Successfully managed stakeholder expectations and communication throughout the lifecycle of a project, resulting in the project being delivered on time and on estimation.
- Effectively gathered and documented all the latest business requirements for multiple legacy projects, ensuring its availability whenever users need for revision and training purposes.
- Deliver estimation for Bahncard (a transportation ticketing project serving for many stations in Germany) and small running projects on change requests
